1. Platform Overview

NEXUS HRMS is a comprehensive SaaS-based AI-powered Human Resource Management System designed to serve organizations of all sizes. The platform provides 35+ modules covering every aspect of HR management from talent acquisition through payroll processing, performance management, and employee separation. Built with a multi-tenant architecture, NEXUS HRMS enables service providers to manage multiple client organizations while ensuring complete data isolation between tenants.

1.1 SaaS Multi-Tenant Architecture

The platform implements a hierarchical multi-tenant data model supporting the complete organizational structure from platform level down to individual employees. At the top sits the Super Admin managing the entire SaaS platform including tenant provisioning and subscription management. Each Tenant represents a client organization with Company Groups, Companies, Branches, Departments, and Designations. The subscription system supports multiple plan types including starter, professional, enterprise, global enterprise, staffing, and white label with feature flags controlling module access per tier.

1.2 User Roles and Permissions

NEXUS HRMS implements a sophisticated role-based access control with 14 distinct user roles. The database stores 5 core roles while the application layer expands these into 14 granular roles for precise access control. Each module defines its own role visibility rules and the sidebar dynamically filters based on the authenticated user role.

Role	Description
super_admin	Platform owner with complete system access
tenant_admin	Organization administrator managing their tenant
company_hr_admin	HR administrator for a specific company
hr_executive	HR team member with operational access
dept_head	Department head with team management
reporting_manager	Direct manager with approvals
employee	Standard employee with self-service
finance	Finance team with payroll management

it_admin	IT administrator with asset management
recruiter	Recruitment specialist with ATS access
vendor	External vendor with portal access
sub_vendor	Sub-vendor with limited portal access
client	External client with project visibility
auditor	Read-only access for compliance

2. Module-wise Functional Documentation

This section provides detailed functional specifications for each of the 35+ modules organized by category.

Platform

Super Admin

Platform-level management console for the entire SaaS infrastructure providing centralized control over tenant provisioning, subscription management, and system-wide configuration. Super Admins monitor platform health, manage global settings, and oversee all tenants from a single dashboard.

Key Features:

- Tenant CRUD
- Subscription plan management
- Platform analytics
- Audit log access
- System configuration
- Feature flag management

Attribute	Details
Target Roles	super_admin
Database Models	Tenant, SubscriptionPlan, Subscription, AuditLog
Status Workflows	Tenant: active/suspended/cancelled
Integration Points	All modules

AI Admin Console

Centralized configuration hub for all AI features managing model parameters, prompt templates, scoring algorithms, and monitoring dashboards with usage analytics and cost tracking.

Key Features:

- AI model configuration
- Prompt template management
- Performance monitoring
- Scoring algorithm tuning
- Usage analytics
- Cost tracking

Attribute	Details
Target Roles	super_admin, tenant_admin
Database Models	AIChatLog, Interview
Status Workflows	Model: active/training/deprecated
Integration Points	AI Interview, AI Assistant

Tenant Admin

Multi-tenant management interface for configuring and provisioning tenant organizations with company groups, branches, departments, and user provisioning.

Key Features:

- Company group management
- Branch setup
- Department hierarchy
- User provisioning
- Custom configuration
- Branding

Attribute	Details
Target Roles	super_admin, tenant_admin
Database Models	Tenant, CompanyGroup, Company, Branch, Department, Designation, User
Status Workflows	All entities: active/inactive
Integration Points	Company Management, Employees, Settings

Core HR

Dashboard

Central analytics hub providing HR metrics, employee statistics, and organizational health indicators with interactive charts, KPI cards, and quick-action shortcuts aggregating data from all modules.

Key Features:

- KPI cards
- Interactive charts
- Quick actions
- Recent activities
- Pending approvals
- Team overview
- Calendar

Attribute	Details
Target Roles	All roles
Database Models	Employee, Attendance, LeaveRequest, Payroll, PerformanceReview
Status Workflows	Read-only
Integration Points	All modules

Company Management

Organizational structure management from company groups to designations with multi-level department hierarchies, branch management with geo-data, and designation levels with salary bands.

Key Features:

- Company group CRUD
- Company setup
- Branch management
- Department hierarchy
- Designation with salary bands
- Org chart

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	CompanyGroup, Company, Branch, Department, Designation

Status Workflows	All entities: active/inactive
Integration Points	Employees, Recruitment, Projects

Employees

Comprehensive employee lifecycle management maintaining complete profiles with personal details, employment history, qualifications, skills, bank details, and documents with directory search and org chart visualization.

Key Features:

- Employee directory
- Profile management
- Org chart
- Skill inventory
- Document vault
- Bulk import/export
- Timeline
- Status tracking

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, manager
Database Models	Employee, Dependent, Qualification, Experience, EmployeeSkill, Document, User
Status Workflows	Employee: active/on_leave/probation/notice_period/exited
Integration Points	All people modules

Talent Acquisition

Recruitment

Full-cycle applicant tracking system with AI-powered screening, collaborative evaluation, and pipeline analytics supporting multiple job types and sourcing channels with Kanban-style pipeline management.

Key Features:

- Job posting
- Candidate pipeline
- AI screening
- Interview scheduling
- Collaborative evaluation

- Pipeline analytics
- Source tracking

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, recruiter
Database Models	JobPosting, JobApplication, Interview, Requisition
Status Workflows	JobPosting: open/closed/on_hold/filled; Application: applied/screening/interview/offered/hired/rejected
Integration Points	Requisitions, Offers, AI Interview, Onboarding

Requisitions

Manpower requisition management with multi-level approval workflows enabling departments to request new positions with justifications, budgets, and timelines with priority-based routing.

Key Features:

- Requisition creation
- Multi-level approval
- Budget allocation
- Priority management
- Auto-recruitment trigger
- Fulfillment tracking

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, manager
Database Models	Requisition, Department, Designation
Status Workflows	Requisition: draft/pending_approval/approved/rejected/fulfilled/cancelled
Integration Points	Recruitment, Offers

Offers

Offer letter management from generation to acceptance tracking with customizable templates, approval chains, automated email dispatch, and auto-triggering of preboarding on acceptance.

Key Features:

- Offer generation
- Template management
- Approval chain

- Email dispatch
- Acceptance tracking
- Revision history
- Auto-onboarding trigger

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	JobApplication, JobPosting
Status Workflows	Offer: draft/pending_approval/sent/accepted/rejected/expired/revoked
Integration Points	Recruitment, Preboarding, Payroll

Job Portal

Public career site enabling candidates to browse positions, submit applications, and track status with search, SEO optimization, responsive design, and branded career pages.

Key Features:

- Public job listings
- Application submission
- Status tracking
- Search and filters
- SEO optimization
- Responsive design
- Branded pages

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, job_seeker
Database Models	JobPosting, JobApplication
Status Workflows	Application (public): applied/screening/shortlisted
Integration Points	Recruitment, AI Interview

AI Interview

AI-powered interview system conducting automated assessments with contextual questions, real-time scoring, and detailed feedback supporting multiple interview types with bias detection.

Key Features:

- AI question generation
- Automated assessment
- Real-time scoring
- Feedback generation
- Multiple interview types
- Score analytics
- Bias detection

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	Interview, JobApplication
Status Workflows	Interview: scheduled/in_progress/completed/cancelled
Integration Points	Recruitment, AI Admin Console

Lifecycle

Preboarding

Pre-boarding engagement portal managing document collection, IT setup requests, buddy assignments, and pre-arrival tasks between offer acceptance and day one.

Key Features:

- Document collection
- IT setup requests
- Buddy assignment
- Welcome kit
- Policy pre-acknowledgment
- Pre-arrival tasks
- Progress tracking

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	OnboardingTask, Employee, Document
Status Workflows	OnboardingTask: pending/in_progress/completed
Integration Points	Offers, Onboarding

Onboarding

Structured onboarding with configurable 30/60/90 day task templates managing orientation, training assignments, policy acknowledgments, and milestone check-ins.

Key Features:

- Task templates
- 30/60/90 day programs
- Orientation scheduling
- Training assignment
- Policy acknowledgment
- Milestone check-ins
- Dashboard

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	OnboardingTask, Employee, Training, TrainingEnrollment
Status Workflows	OnboardingTask: pending/in_progress/completed
Integration Points	Preboarding, Training, Employees

Attendance

Attendance tracking with check-in/check-out, shift management, and overtime calculation supporting multiple statuses with regularization workflows and location tracking.

Key Features:

- Check-in/check-out
- Shift management
- Overtime calculation
- Regularization
- Location tracking
- Monthly summary
- Biometric integration

Attribute	Details
Target Roles	All roles
Database Models	Attendance, Shift, Employee
Status Workflows	Attendance: present/absent/late/half_day/holiday/weekend/on_leave

Integration Points	Leave, Payroll, Timesheets
--------------------	----------------------------

Leave Management

Leave management with configurable types, balance tracking, and approval workflows supporting carry-forward rules, half-day requests, and leave calendar with auto-attendance updates.

Key Features:

- Leave type configuration
- Balance tracking
- Approval workflow
- Carry-forward rules
- Half-day support
- Leave calendar
- Team availability

Attribute	Details
Target Roles	All roles
Database Models	LeaveType, LeaveBalance, LeaveRequest, Employee
Status Workflows	LeaveRequest: pending/approved/rejected/cancelled
Integration Points	Attendance, Payroll

Separation

Separation processing for resignations, terminations, retirements, and layoffs managing notice periods, knowledge transfer, clearance checklists, exit interviews, and FNF triggers.

Key Features:

- Resignation submission
- Notice period tracking
- Knowledge transfer
- Clearance checklist
- Exit interview
- Asset recovery
- Account deactivation
- FNF trigger

Attribute	Details
-----------	---------

Target Roles	super_admin, tenant_admin, hr_admin, manager
Database Models	Separation, Employee
Status Workflows	Separation: pending/notice_period/completed/cancelled
Integration Points	FNF, Assets, Payroll

FNF Settlement

Full and final settlement processing calculating pending salary, leave encashment, gratuity, bonus, and recoveries with tax computations and statement generation.

Key Features:

- Settlement calculation
- Leave encashment
- Gratuity
- Recovery tracking
- Tax adjustment
- Payment processing
- Statement generation

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, finance
Database Models	FNFCalculation, Separation, Employee, LeaveBalance
Status Workflows	FNF: draft/computed/approved/paid/disputed
Integration Points	Separation, Payroll, Leave

Compensation

Payroll

Payroll processing engine supporting multi-currency pay runs calculating gross salary, statutory deductions, and net pay with payslip generation, bank files, and GL postings.

Key Features:

- Monthly pay run
- Statutory deductions
- Tax calculation
- Payslip generation

- Bank file export
- GL posting
- Multi-currency support

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, finance
Database Models	Payroll, SalaryStructure, Employee
Status Workflows	Payroll: draft/processed/paid/cancelled
Integration Points	Salary Structures, Attendance, Leave

Salary Structures

CTC breakdown and component management with configurable templates defining salary components with percentage and fixed amounts. Supports salary bands linked to designations.

Key Features:

- CTC template creation
- Component definition
- Salary bands
- Designation-linked structures
- Auto-assignment
- Revision tracking

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	SalaryStructure, Designation, Employee
Status Workflows	SalaryStructure: active/archived
Integration Points	Payroll, Offers, Onboarding

Growth

Performance

Performance management with review cycles featuring self-assessment, manager reviews, 360 feedback, calibration, goal tracking, and development plans linking to promotion and compensation.

Key Features:

- Review cycle management

- Self-assessment
- Manager review
- 360 feedback
- Goal tracking
- Calibration
- Rating scales
- Development plans

Attribute	Details
Target Roles	All roles
Database Models	PerformanceReview, Goal, Feedback, Employee
Status Workflows	PerformanceReview: pending/in_progress/completed; Goal: not_started/in_progress/completed
Integration Points	Training, Succession, Payroll

Training

Learning and development with course catalog, enrollment workflows, and certification tracking supporting online, offline, and hybrid modes with assessment and skill updates.

Key Features:

- Course catalog
- Enrollment workflow
- Scheduling
- Assessment
- Certification
- Feedback
- Skill updates
- Learning paths
- Cost tracking

Attribute	Details
Target Roles	All roles
Database Models	Training, TrainingEnrollment, Employee, EmployeeSkill
Status Workflows	Training: upcoming/ongoing/completed/cancelled
Integration Points	Performance, Onboarding

Engagement

Employee engagement measurement with customizable surveys, eNPS tracking, and action planning providing department-wise breakdowns with trend analysis.

Key Features:

- Survey creation
- Distribution
- Analysis
- eNPS tracking
- Action planning
- Trend analysis
- Department breakdowns

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	Employee, Feedback
Status Workflows	Survey: draft/active/closed
Integration Points	Performance, Reports

Succession Planning

Talent pipeline and succession mapping with position risk assessment, readiness evaluation, 9-box grid analysis, development plans, and visual succession maps.

Key Features:

- Position risk assessment
- Talent readiness
- 9-box grid
- Development plans
- Succession maps
- Pipeline tracking
- Gap analysis

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	Employee, PerformanceReview, Goal, EmployeeSkill
Status Workflows	Status: identified/in_development/ready/active
Integration Points	Performance, Training

Operations

Projects

Project management with lifecycle tracking supporting multiple types and billing models featuring task management, kanban views, milestones, and resource allocation with billing status.

Key Features:

- Project creation
- Team allocation
- Task management
- Kanban
- Milestone tracking
- Billing management
- Progress tracking
- Resource allocation

Attribute	Details
Target Roles	All roles
Database Models	Project, ProjectTask, ProjectMilestone, ProjectAllocation, Client
Status Workflows	Project: draft/active/on_hold/completed/cancelled; Task: todo/in_progress/review/done
Integration Points	Timesheets, Clients

Timesheets

Time tracking and approval linked to projects with daily hour logging, billable/non-billable classification, and manager approval triggering billing and payroll integration.

Key Features:

- Daily time entry
- Project linking
- Approval workflow
- Billable classification
- Payroll integration
- Bulk submission

Attribute	Details
Target Roles	All roles

Database Models	Timesheet, Employee, Project
Status Workflows	Timesheet: draft/submitted/approved/rejected
Integration Points	Projects, Payroll

Travel

Travel request management with approval workflows, itinerary tracking, and multiple travel mode support integrating with expenses for post-travel reimbursement.

Key Features:

- Travel request
- Approval workflow
- Mode selection
- Cost estimation
- Itinerary management
- Policy compliance
- Expense integration

Attribute	Details
Target Roles	All roles
Database Models	TravelRequest, Employee
Status Workflows	TravelRequest: pending/approved/rejected/cancelled/completed
Integration Points	Expenses, Payroll

Expenses

Expense claim management with categorization, receipt upload, and multi-level approval supporting multiple categories with policy-based auto-approval thresholds.

Key Features:

- Claim submission
- Receipt upload
- Category management
- Approval workflow
- Auto-approval
- Reimbursement tracking
- Multi-currency

Attribute	Details
Target Roles	All roles
Database Models	ExpenseClaim, Employee, Reimbursement
Status Workflows	ExpenseClaim: pending/approved/rejected/paid
Integration Points	Travel, Payroll

Assets

Asset lifecycle management from procurement through assignment, maintenance, and retirement tracking assets with serial numbers, warranty info, and condition.

Key Features:

- Asset registration
- Assignment workflow
- Return processing
- Maintenance tracking
- Warranty management
- Condition monitoring
- Depreciation

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, it_admin
Database Models	Asset, AssetAssignment, Employee
Status Workflows	Asset: available/assigned/maintenance/retired
Integration Points	Employees, Separation, Finance

Documents

Enterprise document management with categorization, access control, and expiry tracking managing employee documents and company policies with version control and renewal workflows.

Key Features:

- Document upload
- Categorization
- Access control
- Expiry tracking
- Version control
- Template management

- Renewal workflow
- Search

Attribute	Details
Target Roles	All roles
Database Models	Document, Employee, Policy
Status Workflows	Document: active/expired/archived
Integration Points	Employees, Onboarding, Separation

External

Clients

Client relationship management with contract tracking and project linkage maintaining profiles with contacts, billing, and contract terms.

Key Features:

- Client profiles
- Contact management
- Contract tracking
- Billing setup
- Project linkage
- Performance metrics
- Renewal management

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin, manager
Database Models	Client, Company, Project
Status Workflows	Client: active/inactive/suspended
Integration Points	Projects, Vendors

Vendors

Vendor and sub-vendor management with hierarchical relationships and performance tracking maintaining profiles with specialization, candidate counts, and ratings.

Key Features:

- Vendor profiles
- Hierarchy management

- Qualification tracking
- Contract management
- Performance rating
- Sub-vendor management

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	Vendor, Company
Status Workflows	Vendor: active/inactive/suspended
Integration Points	Recruitment, Clients

Support

Helpdesk

Multi-channel ticket management with SLA tracking and knowledge base supporting multiple ticket categories with auto-assignment, escalation, and satisfaction surveys.

Key Features:

- Ticket creation
- Categorization
- Auto-assignment
- SLA tracking
- Escalation
- Internal comments
- Satisfaction survey
- Knowledge base

Attribute	Details
Target Roles	All roles
Database Models	Ticket, TicketCategory, TicketComment, Employee
Status Workflows	Ticket: open/in_progress/resolved/closed/cancelled
Integration Points	All modules

Grievances

Confidential grievance handling with investigation workflows and resolution tracking supporting multiple types with priority routing and anonymous submission options.

Key Features:

- Grievance submission
- Anonymous option
- Priority routing
- Investigation workflow
- Resolution tracking
- Follow-up
- Confidentiality
- Escalation

Attribute	Details
Target Roles	All roles
Database Models	Grievance, Employee
Status Workflows	Grievance: open/in_progress/resolved/closed
Integration Points	Helpdesk, HR Admin

AI Assistant

AI-powered HR chatbot providing instant answers about policies, leave balances, payroll, and company info using NLP with knowledge retrieval and smart escalation.

Key Features:

- Natural language queries
- Policy lookup
- Leave balance inquiry
- Payroll FAQ
- Knowledge retrieval
- Multi-turn conversation
- Smart escalation

Attribute	Details
Target Roles	All roles
Database Models	AIChatLog, Employee, Policy, LeaveBalance
Status Workflows	Chat: active/resolved/escalated
Integration Points	Helpdesk, All modules

Governance

Workflows

Visual workflow builder for custom approval and automation with drag-and-drop design, conditional branching, parallel approvals, and automated triggers with template library.

Key Features:

- Visual builder
- Conditional branching
- Parallel approvals
- Trigger configuration
- Template library
- Instance monitoring
- SLA rules

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	Workflow, WorkflowInstance
Status Workflows	Workflow: draft/active/archived
Integration Points	All modules

Reports

Comprehensive reporting platform with module-specific and cross-module reports featuring standard templates, custom builder, scheduled generation, and export formats.

Key Features:

- Standard reports
- Custom builder
- Scheduled generation
- Export formats
- Interactive dashboards
- Drill-down
- Cross-module analytics

Attribute	Details
Target Roles	All roles
Database Models	All models (read access)
Status Workflows	Report: draft/scheduled/completed

Integration Points	All modules
--------------------	-------------

Settings

System configuration managing general settings, notification preferences, integrations, feature toggles, and branding with audit trail for changes.

Key Features:

- General settings
- Notification config
- Integration setup
- Feature toggles
- Branding
- Template management
- Audit trail

Attribute	Details
Target Roles	super_admin, tenant_admin, hr_admin
Database Models	Tenant, Company, Policy, Announcement, Holiday, Shift
Status Workflows	Setting: active/archived
Integration Points	All modules

Notifications

Centralized notification management with in-app and email delivery supporting 7 types and 8 categories with read/unread tracking and configurable preferences.

Key Features:

- In-app notifications
- Email delivery
- Read/unread tracking
- Category filtering
- Bulk operations
- Preferences
- Real-time updates

Attribute	Details
Target Roles	All roles
Database Models	Notification, User
Status Workflows	Notification: read/unread

Integration Points	All modules
--------------------	-------------

3. Cross-Module Workflows

3.1 Hire to Retire

The complete employee lifecycle spans from initial recruitment through final settlement. The journey begins with requisition approval and job posting, progresses through candidate sourcing, AI screening, interviews, and offer generation. Upon acceptance, preboarding activates for document collection and setup. Onboarding manages the first 90 days. Throughout employment, the system handles attendance, leave, performance, training, and compensation. Separation triggers clearance and FNF settlement.

3.2 Recruitment to Onboarding

When a candidate accepts an offer, the system auto-triggers preboarding task creation with customized checklists for document collection, IT setup, and policy acknowledgment. As tasks complete, Onboarding prepares day-one activities with automatic profile creation in the Employees module.

3.3 Leave to Payroll

Leave and payroll are tightly integrated. Approved leave automatically updates Attendance records. During payroll processing, the system references attendance data and leave balances for salary adjustments including unpaid leave deductions and leave encashment calculations.

4. Role-Based Access Matrix

Module access by role: F = Full CRUD, R = Read/View, - = No access. Enforced at both UI and API levels.

SA	TA	HR	Mgr	Emp					
F	F	F	F	F	F	F	F	F	
-	R	R	R	R	R	R	R	R	
-	R	F	-	-	-	R	R	-	

-	R	F	F	-	-	R	-	-	
-	R	-	-	F	-	R	-	-	
-	R	-	-	-	F	R	-	-	
-	R	-	-	-	-	F	-	-	
-	R	-	-	-	-	-	F	-	
-	R	-	-	-	-	-	-	F	
-	-	-	-	-	-	-	-	-	
-	F	F	-	-	-	-	-	-	

5. Notification and Alert System

The notification system provides real-time event-driven alerts across all modules with in-app and email delivery. Supports 7 types (info/success/warning/error/login/logout/workflow) and 8 categories (system/auth/leave/payroll/recruitment/performance/workflow/alert) with configurable preferences per user.

Type	Description
info	General information
success	Completed actions
warning	Issues requiring attention
error	Failed operations
login	Authentication events
logout	Session termination
workflow	Workflow state changes

6. Reporting and Analytics

Comprehensive reporting framework spanning all modules with standard and custom reports supporting PDF, Excel, CSV export with scheduled generation and email delivery. Interactive dashboards provide drill-down analysis capabilities for strategic workforce planning.

Module	Key Reports
--------	-------------

Employee	Headcount, attrition, demographics, trends
Recruitment	Pipeline, time-to-hire, source effectiveness
Attendance	Summary, late arrivals, overtime, absenteeism
Leave	Balance, utilization, department comparison
Payroll	Pay register, tax summary, deductions
Performance	Rating distribution, goal completion, calibration
Training	Enrollment, completion rate, skill gaps
Projects	Utilization, billing, milestone status
Helpdesk	Ticket volume, SLA compliance, resolution time
Finance	Expense trends, travel costs, asset depreciation
