1. Knowledge Hub Architecture

The NEXUS HRMS GitHub Wiki Knowledge Hub serves as the central documentation repository and navigation system for all platform documentation. It provides a structured, searchable, and maintainable documentation framework that serves all stakeholders — from developers to end users, from administrators to auditors.

1.1 Wiki Structure

The Knowledge Hub is organized into a hierarchical wiki structure with the following levels:

- **Home Page:** The landing page providing a welcome message, quick links, and a visual documentation map.
- **Category Pages:** Top-level pages for each documentation category (Technical, Functional, Workflow, Security, AI, SOP, Training).
- **Document Pages:** Individual wiki pages for each complete document, containing the full content with internal navigation.
- **Quick Reference Pages:** Condensed one-page summaries for each module category for fast lookups.
- **Index Pages:** Cross-reference and index pages enabling multi-dimensional navigation across the documentation set.
- **Contribution Guide:** Guidelines for documentation contributors including style, format, and review processes.

1.2 Sidebar Navigation

The GitHub Wiki sidebar provides persistent navigation across all pages. It is organized hierarchically with category headings and document links, enabling one-click access to any document from any page.

- **Navigation Depth:** Maximum 3 levels in the sidebar — Category → Document → Section. Deeper nesting is avoided for usability.
- **Visual Hierarchy:** Category headings are bold, document links are regular weight, and section links are indented and smaller.
- **Category Icons:** Each category uses an emoji icon for quick visual identification in the sidebar.
- **Current Page Indicator:** The current page link is highlighted or marked in the sidebar for orientation.

- **Search Integration:** GitHub's built-in wiki search is supplemented with a custom index page for topic-based discovery.
- **Mobile Consideration:** Sidebar content is concise enough to be usable on mobile viewports where sidebar space is limited.

1.3 Category Organization

Category	Icon	Description	Document Count
Technical	⚙️	Architecture, API, database, deployment documentation	2
Functional	📄	Module features, user guides, configuration references	1
Workflow	📄	Process flows, status transitions, cross-module workflows	1
Security	📄	Authentication, authorization, data protection, compliance	1
AI	📄	AI features, SDK integration, configuration, ethics	1
SOP	📄	Standard operating procedures, emergency procedures	1
Training	📄	Video scripts, production guides, learning content	1
Index	📄	Cross-references, navigation, maintenance guides	1

2. Documentation Index

The Documentation Index provides a comprehensive listing of all documents in the NEXUS HRMS Knowledge Hub. This is the primary reference for locating specific documentation and understanding the documentation coverage.

2.1 Complete Document Listing

Document Name	Category	Target Audience	File Location	Last Updated
Technical Documentation	Technical	Developers, Architects, DevOps	/docs/NEXUS-HRMS-Technical-Documentation.pdf	2026-06-01
Functional Documentation	Functional	HR, Managers, Admins	/docs/NEXUS-HRMS-Functional-Documentation.pdf	2026-06-01

Workflow Documentation	Workflow	HR, Managers, Process Owners	/docs/NEXUS-HRMS-Workflow-Documentation.pdf	2026-06-01
Security Features Documentation	Security	Security Team, Admins, Auditors	/docs/NEXUS-HRMS-Security-Documentation.pdf	2026-06-01
AI Documentation	AI	AI Admins, HR, Developers	/docs/NEXUS-HRMS-AI-Documentation.pdf	2026-06-01
SOP Documents	SOP	HR, Admins, All Users	/docs/NEXUS-HRMS-SOP-Documents.pdf	2026-06-01
Training Video Scripts	Training	Training Team, Content Creators	/docs/NEXUS-HRMS-Training-Video-Scripts.pdf	2026-06-01
GitHub Wiki Knowledge Hub	Index	All Stakeholders	/docs/NEXUS-HRMS-GitHub-Wiki-Knowledge-Hub.pdf	2026-06-01

2.2 Document Detail Cards

Each document in the Knowledge Hub has an associated detail card providing metadata for management and maintenance:

- **Document Title:** Full official title of the document.
- **Document ID:** Unique identifier (e.g., NEXUS-DOC-TECH-001).
- **Category:** Primary classification category from the 8 defined categories.
- **Version:** Current version number following semver (e.g., 1.0.0).
- **Status:** Draft, Review, Published, or Archived.
- **Owner:** Team or individual responsible for content accuracy.
- **Target Audience:** Primary and secondary audience roles.
- **Module Coverage:** List of NEXUS modules covered in the document.
- **Page Count:** Approximate page count for the PDF.
- **Last Updated:** Date of the most recent content revision.
- **Next Review Date:** Scheduled date for the next content review.
- **Dependencies:** Other documents this document references or depends on.

3. Wiki Sidebar Navigation Structure

The sidebar navigation provides persistent, one-click access to all wiki content. Below is the complete sidebar structure in Markdown format, ready for

deployment to the GitHub Wiki _Sidebar.md file.

3.1 Sidebar Markdown Code

```

4. Wiki Home Page Content

The Wiki Home Page is the first page users see when they access the Knowledge Hub. It provides a welcome message, quick navigation links, and a visual overview of the documentation structure.

4.1 Welcome Message

Welcome to the NEXUS HRMS Knowledge Hub — your comprehensive reference for everything about the NEXUS Human Resource Management System. This wiki contains complete documentation covering technical architecture, functional features, workflows, security, AI capabilities, standard operating procedures, and training materials.

4.2 Quick Links

Quick Link	Description	Audience
Getting Started	New to NEXUS? Start here for an overview and setup guide	Everyone
Technical Architecture	System architecture, API reference, and database documentation	Developers
Module Features	Feature descriptions and configuration for all 35+ modules	HR, Admins
Workflow Reference	Process flows, status transitions, and workflow configuration	Process Owners
Security & Compliance	Authentication, authorization, data protection, and audit	Security Team
AI Features Guide	AI Interview, AI Assistant, and AI configuration	AI Admins, HR
Standard Operating Procedures	Step-by-step procedures for all critical operations	All Users
Training Materials	Video scripts and learning content for platform training	Training Team

4.3 Documentation Map

The documentation map provides a visual overview of the Knowledge Hub structure, showing how documents relate to each other and to the platform modules:

- **Core Documentation Layer:** Technical Documentation and Functional Documentation form the foundation, providing system architecture and feature descriptions that all other documents reference.
- **Process Documentation Layer:** Workflow Documentation and SOP Documents build on the core layer, providing operational procedures and process specifications.
- **Specialized Documentation Layer:** Security Documentation and AI Documentation provide deep-dive references for specialized domains.
- **Enablement Layer:** Training Video Scripts translate documentation into learning content for end-user training.
- **Navigation Layer:** This Knowledge Hub Index provides cross-referencing and navigation across all layers.

5. Module Documentation Cross-Reference

The Module Documentation Cross-Reference table shows which documents cover each NEXUS module. This enables users to quickly find all relevant documentation for a specific module across the entire document set.

Module	Technical	Functional	Workflow	Security	AI	SOP	Training
Super Admin	✓	✓	✓	✓	✓	✓	
Tenant Admin	✓	✓	✓	✓		✓	✓
Employee Mgmt	✓	✓	✓	✓		✓	✓
Recruitment	✓	✓	✓		✓	✓	✓
Offers	✓	✓	✓			✓	
AI Interview	✓	✓	✓		✓	✓	✓
Onboarding	✓	✓	✓			✓	✓
Attendance	✓	✓	✓			✓	✓
Leave Mgmt	✓	✓	✓			✓	✓
Payroll	✓	✓	✓	✓		✓	✓

Performance	✓	✓	✓		✓	✓	✓
Training	✓	✓	✓		✓	✓	✓
Separation	✓	✓	✓			✓	
FNF	✓	✓	✓			✓	
Helpdesk	✓	✓	✓		✓	✓	✓
Projects	✓	✓	✓			✓	✓
Expenses	✓	✓	✓			✓	
Assets	✓	✓	✓			✓	
AI Assistant	✓	✓	✓		✓		✓
Reports	✓	✓	✓				✓
Settings	✓	✓	✓	✓	✓		✓

The ✓ symbol indicates that the module is covered in the respective document. Use this cross-reference to locate all documentation relevant to a specific module or to identify gaps in documentation coverage.

6. Quick Reference Cards

Quick Reference Cards provide condensed, one-page summaries for each module category. They are designed for printing or quick on-screen reference, containing the most essential information from the full documentation set.

6.1 Core HR Quick Reference

Module	Key Feature	Primary Users	Critical Workflow
Employee Mgmt	Profile, Documents, Org Chart	HR, Employees	Profile Update → Approval
Attendance	Check-in/Out, Regularization	Employees, Managers	Check-in → Anomaly → Regularize → Approve
Leave Mgmt	Application, Balance, Calendar	Employees, Managers	Apply → Validate → Approve → Deduct
Payroll	Salary Processing, Payslips	HR, Finance	Initiate → Compute → Approve → Disburse
Onboarding	Task Checklist, Welcome, Docs	HR, IT, New Hires	Auto-create → Tasks → Verify → Complete

Separation	Resignation, Exit, FNF	HR, Finance, IT	Submit → Notice → Exit → FNF
------------	------------------------	-----------------	------------------------------

6.2 Talent Management Quick Reference

Module	Key Feature	Primary Users	Critical Workflow
Recruitment	Requisition, Screening, Pipeline	HR, Managers	Requisition → Post → Screen → Interview → Offer
AI Interview	AI Questions, Scoring, Feedback	Recruiters, AI	Configure → Schedule → Evaluate → Score
Performance	Reviews, Goals, Calibration	All Users	Initiate → Self-Assess → Manager → Calibrate → Publish
Training	Courses, Enrollment, Certificates	HR, Employees	Create → Enroll → Complete → Certify
Goals & OKR	Objectives, Key Results, Alignment	All Users	Set → Align → Track → Evaluate

6.3 Operations Quick Reference

Module	Key Feature	Primary Users	Critical Workflow
Projects	Tasks, Timesheets, Milestones	PM, Team Members	Create → Assign → Track → Complete → Close
Expenses	Claims, Approval, Reimbursement	Employees, Finance	Submit → Approve → Verify → Reimburse
Assets	Inventory, Allocation, Recovery	IT, Admin, Employees	Register → Allocate → Track → Recover
Travel	Requests, Advances, Settlement	Employees, Finance	Request → Approve → Advance → Settle
Helpdesk	Tickets, AI Routing, Resolution	All Users, Agents	Create → Route → Resolve → Close

6.4 Administration Quick Reference

Module	Key Feature	Primary Users	Critical Workflow
Super Admin	Tenant Mgmt, Platform Config	Super Admin	Create Tenant → Configure → Activate
Tenant Admin	Org Setup, Policy Config	Tenant Admin	Setup → Policies → Modules → Users
Security	Auth, RBAC, Audit Logs	Admins, Security	Configure → Monitor → Audit → Remediate
AI Admin	Model Config, Templates, Costs	Super Admin, Tenant Admin	Select Model → Template → Deploy → Monitor
Reports	Analytics, Exports, Schedules	All Authorized	Select → Configure → Generate → Export
Settings	Platform Config, Preferences	Admins	Navigate → Configure → Save → Publish

7. Contributing to the Wiki

The NEXUS HRMS Knowledge Hub is a collaborative documentation resource. This section defines the guidelines and processes for contributing to, reviewing, and maintaining the wiki content.

7.1 Editing Guidelines

- **Markdown Format:** All wiki content must be written in GitHub Flavored Markdown. Use proper heading hierarchy (H1 → H2 → H3), code blocks with language specification, and tables for structured data.
- **Writing Style:** Use clear, concise language. Write in active voice. Use present tense for descriptions and imperative mood for instructions. Avoid jargon unless the audience is technical.
- **Document Structure:** Follow the standard document structure: Title → Introduction → Content Sections → Related References. Each page should be self-contained but link to related content.
- **Code Examples:** All code examples must be tested and working. Include language specification in code block markers. Add comments explaining non-obvious logic.
- **Screenshots:** Screenshots should be current (within the last release), at standard resolution, and annotated with callouts where needed. Use the training tenant data only.

- **Links:** Use relative wiki links for internal references and absolute URLs for external resources. Verify all links after editing. Broken links must be fixed within 48 hours of discovery.
- **Length:** Individual wiki pages should be under 3000 words. If a topic requires more content, split into multiple pages with a hub page linking them.
- **Review Before Commit:** Always preview your changes before committing. Check for formatting issues, broken links, and factual accuracy.

7.2 Review Process

All significant wiki changes must go through the review process to ensure accuracy and consistency:

- **Step 1 — Draft:** Create or edit the wiki content in a branch or fork. Mark the page status as "Draft" in the page metadata.
- **Step 2 — Self-Review:** Review your own changes for formatting, links, accuracy, and completeness before requesting peer review.
- **Step 3 — Peer Review:** Request review from at least one subject matter expert. The reviewer checks for technical accuracy, completeness, and clarity.
- **Step 4 — Editorial Review:** The documentation lead reviews for style consistency, cross-reference integrity, and adherence to wiki standards.
- **Step 5 — Approval:** The module owner or documentation lead approves the changes for publication.
- **Step 6 — Publication:** Merge the reviewed changes into the main wiki. Update the "Last Updated" date and version number.
- **Step 7 — Notification:** Announce significant documentation updates through the team communication channel.

7.3 Naming Conventions

- **Page Names:** Use PascalCase for wiki page names (e.g., "AiInterviewModule", "SecurityArchitecture"). This ensures consistent URL generation and readability.
- **Headings:** Use sentence case for headings (e.g., "Getting started with NEXUS" not "Getting Started With NEXUS"). This follows modern documentation style guides.
- **Document IDs:** Follow the format NEXUS-[CATEGORY]-[NUMBER] (e.g., NEXUS-TECH-001, NEXUS-SOP-015). Category codes: TECH, FUNC, WORK, SEC, AI, SOP, TRN, IDX.

- **File Names:** PDF files follow the format NEXUS-HRMS-[DescriptiveName].pdf (e.g., NEXUS-HRMS-Technical-Documentation.pdf).
- **Branch Names:** Documentation branches follow the format docs/[category]/[brief-description] (e.g., docs/security/add-vulnerability-assessment).
- **Commit Messages:** Use the format "docs: [action] [subject]" (e.g., "docs: add AI interview configuration guide", "docs: fix broken links in security section").
- **Tags:** Apply version tags to documentation snapshots following the pattern docs/v[major].[minor] (e.g., docs/v1.0, docs/v1.1).

8. Documentation Maintenance Schedule

Regular documentation maintenance ensures the Knowledge Hub remains accurate, current, and useful. This section defines the maintenance schedule, responsibilities, and processes.

8.1 Review Schedule

Frequency	Activity	Scope	Responsible	Deadline
Weekly	Link check and formatting review	All wiki pages	Documentation Lead	Every Friday
Monthly	Content accuracy review	SOPs and Workflow docs	Module Owners	Last week of month
Quarterly	Comprehensive content review	All documents	Documentation Team	End of quarter
Release-Based	Update for new features	Affected documents	Feature Teams	Within 1 week of release
Incident-Based	Update for issues/gaps found	Specific documents	Any contributor	Within 48 hours
Annual	Full documentation audit	Complete Knowledge Hub	Documentation Lead + QA	January

8.2 Version Management

- **Semantic Versioning:** Documentation versions follow semver: MAJOR.MINOR.PATCH. Major for restructuring, Minor for new content, Patch for corrections.
- **Version Tracking:** Each document maintains a version history table at the end of the document. Every change updates the version number and history.
- **Changelog:** A global CHANGELOG.md in the wiki root tracks all documentation changes with dates, authors, and descriptions.
- **Archive Policy:** Major version superseded documents are archived to an "Archive" section but remain accessible for reference.
- **Branching Strategy:** Documentation changes are made in feature branches and merged through the review process. The main branch always reflects the current published state.

8.3 Quality Metrics

Documentation quality is measured through the following metrics, tracked quarterly:

Metric	Target	Current	Measurement Method
Content Accuracy	> 95%	Baseline	Expert review sampling
Link Integrity	100%	Baseline	Automated link checker
Coverage Completeness	> 90% of modules	Baseline	Cross-reference audit
Freshness (updated within 90 days)	> 80% of pages	Baseline	Automated date checker
User Satisfaction	> 4.0/5	Baseline	Quarterly survey
Broken Links	0	Baseline	Weekly automated scan
Orphaned Pages	0	Baseline	Wiki structure audit

8.4 Maintenance Responsibilities

Role	Responsibility	Time Commitment
Documentation Lead	Overall quality, review process, maintenance schedule	20% of time
Module Owners	Content accuracy for their module, review approvals	5% of time
Technical Writers	Content creation, editing, formatting	Full-time (allocated)

Contributors	Draft content, fix issues, suggest improvements	As needed
QA Reviewer	Link checking, formatting review, test instructions	10% of time
